KEYCHAINS

MADE OF RECYCLED MATERIAL

From 2021 nearly all our keychains are available in recycled acrylic. The available standard colours are the same as for standard acrylic. The recycled materials are in general nice and clear. There can sometimes be minor variations in colours and small impurities in the material, but in our opinion, these small differences only helps to emphasize that the material is recycled.

All recycled keychains are available with either standard ring (Ø 22 mm) or an elegant flat ring in chrome-look (Ø 28 mm), including stamping on both sides: "RECYCLED PLASTIC" and "MADE IN DENMARK".

NEWS 2021: Selected keychains are also available in a special material - recycled car lights.

WE TURN **CAR LIGHTS** INTO KEYCHAINS

We are now able to present a new type of recycled material – extracted from recycled Cars. The red tail lights are shredded and converted to the grains that we use. A 100% recycled material that gives our products a nice and deep red transparent colour.

Keychains made from this material will be an addition to our existing recycled collection.

CURRENT SELECTION

Our current selection consists of 4 keychains made of recycled car lights. For other request or more information, please contact our sales team.
